

VPS Kit Specifications

Standard VPS Kit

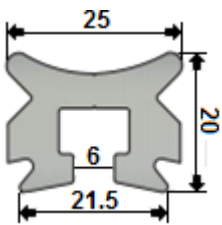

Pole Range 45mm – 80mm

Our standard VPS kit is designed for pole stowage on the mast. Our poles ranging from 45mm – 80mm in diameter have a piston trigger inboard end which attaches to our extruded spinnaker car with stainless ring.

The standard kit includes:

3.5 metres of 25mm track, 2 x v cleats, 2 x turning blocks, 2 x track end stops, 1 x 3008 car w/ring, 1 x stowage bracket and 1 x control line.

25mm Track

V Cleats

Turning Blocks

Stowage Bracket

Car w/Ring

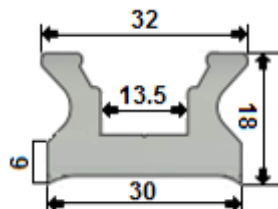

Non-Standard VPS Kit

Pole Range 80mm - 100mm

Our 80mm & 100mm poles do have the option for piston style ends but when stowing on the mast we recommend our cone style end. This end connects to a different type of car with use of a stainless finger which inserts into the cone inboard end.

This kit includes all items listed above, replacing the ring car with the finger car. This kit can also be adjusted for use with a 32mm track depending on mast size.
